

BAWDESWELL HEATH WORK PARTY

There has been some environmental conservation work taking place on Bawdeswell Heath recently. A grant was obtained from Norfolk Wildlife Trust and a contractor employed to start clearing the Gorse, young Birch trees and to cut back a percentage of the old heather.

There was also a group of students from Easton and Otley college who came to spend several days working hard on The Heath. They joined in with the clearing and also started felling some of the young Birch trees.

The Trustees would like to thank all those who came to The Heath and worked so hard.

The aim is to maintain the open areas on the East and West sides of The Heath and to restrict the spread of Gorse and colonisation by the Birch trees. We hope that another grant will allow work to restart in the Autumn.

Thank you
The Trustees
